HIGHLY PRODUCTIVE SYSTEM

Featuring an expanded build cylinder of $433 \times 358 \times 400$ mm, the FS350M is capable of producing large metal parts from a wide range of powder materials. With multi-laser configuration and thicker layer process, the FS350M offers optional Beam Shaping Technology, greatly enhancing the production efficiency.

EFFICIENCY + SAFETY

Equipped with advanced multi-laser scanning strategy and calibration algorithms, the FS350M offers optimal build efficiency, and uniformed part performance in overlapping areas. The closed-loop Powder Management System, intelligent recoating control, and advanced layered gas flow design allow for efficient, yet uniformed melting process of metal powder.

COST PERFORMANCE + OPEN

The FS350M features a machine footprint as small as 6.03 sqm with an integrated Permanent Filtration System. In an additive factory setting, FS350M enables high density layout to achieve maximum throughput per floor area at economical additive production cost. Like all Farsoon machines, the FS350M is a truly open platform which offers the user a high degree of control to tailor processing parameters for industrial application requirements and cost competitive metal additive manufacturing.
